

# The 2010 CBA State of the Industry Report

Each year, as the Association for the Christian Retail Channel, CBA compiles the annual State of the Industry report. This year's report has been compiled based on 150 anonymous survey responses based on sales and operations data from the 2009 calendar year. The data contained in this survey is historical in that it details what the industry has seen over the past year. However, it is also a report utilized by many to make plans for the future based on industry trends and practices utilized by others to achieve positive results.
